

Exciting News!

VDI is Here!

With *fast NEW* PCs in each patient room and at the nursing stations

VDI (Virtual Desktop Infrastructure) is a new method by which you, the user, are able to log in to your session on one PC and roam to another PC and keep your session open. It is very similar to the old "Rapid Access" technology.

Key points to remember:

- Use your same username and Password
- Click on "Disconnect" at bottom left of screen to keep your session and reconnect to it on another PC.
- Click on "Red Logoff" at top left to end your session for the day.
- Feel free to use any computer at any location including those in patient rooms.

Please call Pat James at 481-8960 or 326-2401 with questions/problems.
